WHAT makes Nalgene Desiccators the clear choice?

The new Nalgene Polycarbonate Desiccator is transparent for easy viewing of samples. It's lightweight, stable, and unbreakable. Designed for both vacuum and non-vacuum applications. Seals without grease. Costs much less than glass.

Available from your Authorized Nalgene Labware Dealer worldwide.

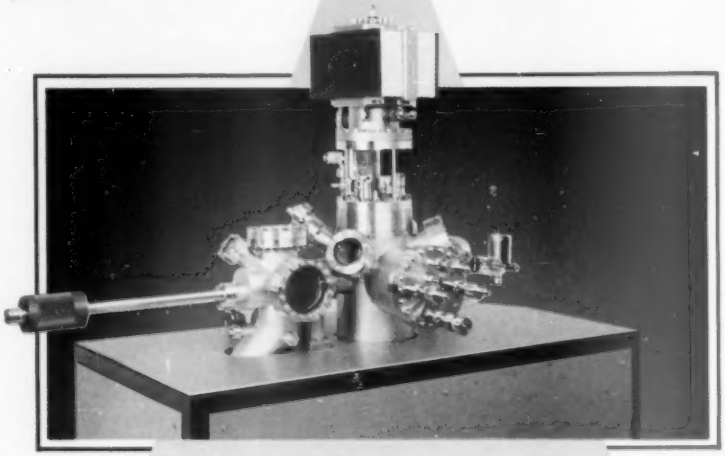
RIBER NANOSCAN 50

The latest technology in Auger microscopy



ISA RIBER INTRODUCES
THE NANOSCAN 50 AUGER MICROPROBE

SEE DETAILS: very high SEM/SAM spatial resolution with unique low energy, high brightness field emission source (1 nA into 35 nm at 15 keV).

GET CHEMICAL INFORMATION AND UNEQUALLED SENSITIVITY: award-winning MAC 2 electron energy analyzer.

SAVE VALUABLE TIME: video-rate image acquisition in SEM and SAM.

SAVE TIME AND EFFORT: complete computer control: digital electronics, motorized sample holder, unattended overnight operation, multitasking.

ADD AUXILIARY TECHNIQUES: optional XPS, SIMS, ISS, EDX.

HOW
Nalgene Solvent Bottles put organic solvents in their place.

Nylon provides excellent chemical resistance and low permeation to organic solvents. Specify lightweight, shatter-proof all-nylon Nalgene Solvent and Solvent Wash Bottles for sure storage and dispensing of acetone, toluene, and other solvents used in HPLC, TLC, gas chromatography, and general lab applications. At less cost than fluoro-polymer bottles! From Authorized Nalgene Labware Dealers worldwide.

The new EDAX PV9800 starts with a great deal

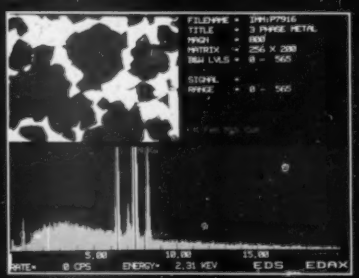
...and grows from there

It begins by offering you the most advanced Energy Dispersive X-Ray Microanalysis System in the business. With enough built-in capability to satisfy over 95% of all application requirements. And all the convenience features you need for speed and flexibility.

Like full quantitative EDS, for example. Split screen. Automatic identification of elements. Programmable function keys and Dynastatic Display. Plus a unique operator console that actually prompts you, step-by-step, through the entire analytical procedure.

All at a fraction of what you'd normally expect to pay.

That's a great deal—no matter how you look at it. But with the PV9800, that's only the beginning.



Because the PV9800 expands as your needs expand. Defies obsolescence. Allows you to add capabilities like automatic wavelength dispersive X-Ray analysis. And EELS. And complete interactive microscope control. All in easy-to-take increments. As you need them. In a way that won't strain your capital budget.

And there's more, still. A great deal more. Enough to fill an entire brochure. Send for your free copy and get the complete story. Write or call: EDAX International, Inc., P.O. Box 135, Prairie View, IL 60069. Tel (312) 634-0600.

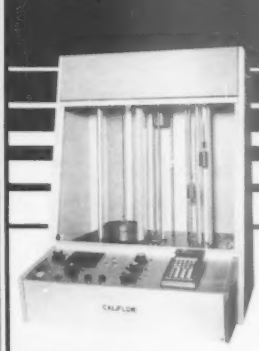
Mass Flow Calibration

CALIFLOW: Primary Standard

FTS–3: Transfer Standard



- High accuracy
- NBS traceability
- Wide range to 50 slm
- Digital electronics
- Automatic features

- Microprocessor programmer/display
- Temperature controlled standards
- Uninterruptible power supply
- Accommodates four metered ranges
- NBS traceable calibration data supplied
- Hard copy data plots available
